		I hereby declare that I have read the terms and conditions overleaf and accept that End House Stud will endeavour to take all safety precautions with my mare, and I agree to leave her in their care at my own risk.	
Post Code:		Signed:	Date:

Terms and Conditions

- All visiting mares to be wormed before arrival at stud then it is the owners responsibility to inform the stud when the mare is due to be wormed.
- We recommend your mare is EVA tested/vaccinated and has had a tetanus booster 6 weeks prior to foaling date.
- All passports or identity documents must be brought to stud.
- Livery charges are in respect of accommodation, supplementary feeding, Blacksmith, Vet etc. and are not included. Any mares or foals which the stud feels need supplementary feeding will be fed and the owners charged accordingly. Any mares especially those with foals at foot which the stud consider need stabling due to adverse weather conditions though normally at grass, will be stabled and the owner charged accordingly.
- In the event of a mare or foal requiring veterinary assistance, this will be summoned at our discretion although every effort will be made to contact the owner. Mares will be under supervision of the End House Stud Veterinary surgeon, I agree to allow End House Stud's qualified and trained staff to administer treatment prescribed by the veterinary surgeon to my mare.
- It is in the interest of the owner to vaccinate their mare against flu and tetanus and to have them insured.
- Stud accounts must be settled before the mare leaves the stud - with no exceptions.
- It is requested that all mares should be sent recently attended to by the farrier, hind shoes can be removed at stud but all mares will be stabled until farrier is present. Mares will be treated by our farrier when deemed necessary and will be charged to the owner accordingly.
- Whilst we take every care and attention that the mare will receive every possible care, attention and supervision, no responsibility whatsoever can be accepted for accident or disease and mares can only be taken on this understanding.
- The mare must be sent to stud with a correctly fitting head collar and any rugs/ equipment should be clearly marked with owners name. The stud cannot be held responsible for any loss or damage to any items left at stud.
- If the mare proves to be difficult to catch regrettably she will have to be stabled as she increases the risk to herself if we are unable to check on her regularly throughout the day.
- Foals are checked by the stud vet as a matter of routine in the first 24 hours. We recommend all foals receive an IGG blood test at post 18 hours old as though a mare may appear to have a lot of milk the foal may not be absorbing it properly or it may be of poor quality. This ensures the well-being of you foal
- **Any damage to foaling alarms caused by the mare will be charged to the mare owner and mares can only be taken on this understanding**.
